DETAILED ACTION***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance:

The prior art fails to teach the method of managing a system of financial components, comprising the following module components: a plurality of management protocol agent versions, external system management components and their respective protocols, a command dispatch agent and its protocol, and a component registry, where the management protocol agent interfaces with an external system financial management product on the network translates a specific system management protocol to or from a format supported by the command dispatch agent. In addition, the management protocol agent translates an incoming management request into an inquiry for the command dispatcher agent. The command dispatch agent translates requests for actions or status into the proper control instrument variables needed to control a component or retrieve its status according to the following algorithm: executing the command by the command dispatch agent via an interface published by the managed component by dispatching the command to the managed component, receiving a response from the managed component, and providing the response to the management protocol agent; translating the response by the management protocol agent from the format supported by the command dispatch agent into the particular remote management system protocol format for the external system management component; and providing the response to the management request to the external system management component by the management protocol agent via the external interface in the particular remote management system protocol format.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
